

# TERLIPRESSIN EVER PHARMA

Terlipressin acetate

0.85mg  
5ml

1.7mg  
10ml

TERLIPRESSIN EVER PHARMA is indicated for the treatment of bleeding oesophageal varices and patients with hepatorenal syndrome (HRS) Type I who are actively being considered for liver transplant.

**TERLIPRESSIN EVER PHARMA was developed to offer a more convenient and safer to handle product. Available as a ready to use solution in a vial, there is no need to either reconstitute the product with solvent or break open ampoules.**

**Both initial and maintenance dose ranges are conveniently and economically covered by providing a 10ml vial in addition to the current 5ml vial.**

- **Ready to use product** - for immediate use without reconstitution
- **Available in vials** - more convenient than ampoules
- **0.85mg and a new 1.7mg presentation**  
covering initial and maintenance dose ranges
